

## **STOKVIS TAPES SVERIGE AB:S ENVIRONMENT AND SUSTAINABILITY POLICY**

We shall work to prevent pollution that may arise to land, water and air from our operations. We are working with continuous improvements with a life cycle perspective where the environment is the focus and comply with laws and other requirements we are subject to. A presumption for fulfilling this is that:

- our staff has the necessary environmental knowledge and training
- our staff has a commitment to environment and sustainability
- We work actively together with our suppliers in environment & sustainability
- we have a working environment and sustainability cooperation with our customers
- set relevant environmental and sustainability goals

Our most important resources in this work are our staff and a functioning managementsystem.

We are certified according to ISO 14001:2015 and our environmental management system is applied to all parts of our operations at Zinkgatan 6, Norrköping
