

MORE THAN TAPE

effective solutions

Self-adhesive tape is often the hidden green driving force of product innovation in a range of applications. Current product designs require bonding of uneven substrates and different shapes. Because self-adhesive tapes can fulfill multiple functions at the same time, for example mounting and sealing, products can be designed thinner and lighter, and produced more efficiently. Self-adhesive tapes are reliable since they are resistant to various environmental conditions. The use of tapes facilitates recycling and repairing, which contributes to sustainability.

What is possible with tape?

- sealing
- time-saving
- reliable bonding
- weight-saving
- aesthetic appearance
- thermal management
- shielding
- protecting
- electrical insulation & conduction
- detecting
- thermal insulation
- heat management (TIM)
- surface protection
- masking
- EMI/RFI shielding & grounding
- sound insulation
- vibration & shock reduction

Customized solutions

- laminating
- die-cutting
- slitting
- rewinding
- spooling
- printing

Our services

- cleanroom
- tape test laboratory
- engineering
- logistics
- proto typing
- private label

E.g. for these industries

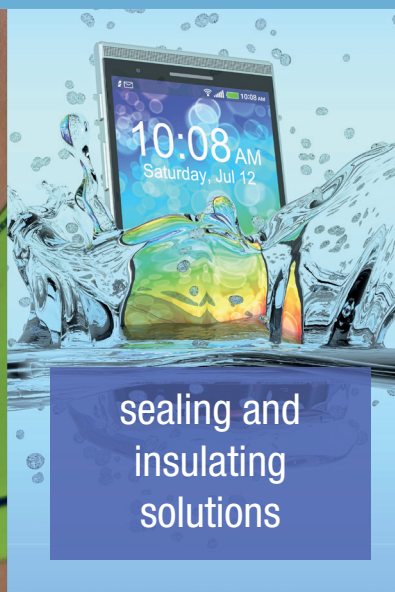

- healthcare
- automotive
- e-mobility
- building & construction
- renewable energy
- electronics
- aerospace
- paper & graphic
- wholesale

high-quality and
long-term
bonding

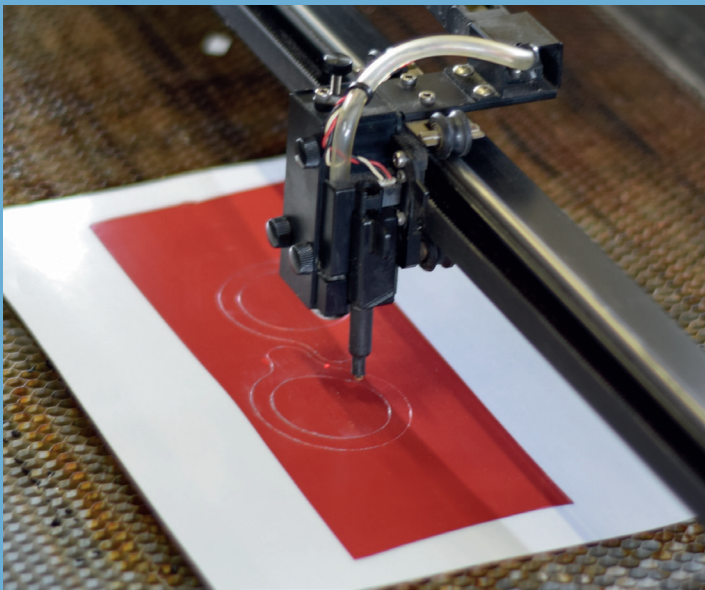

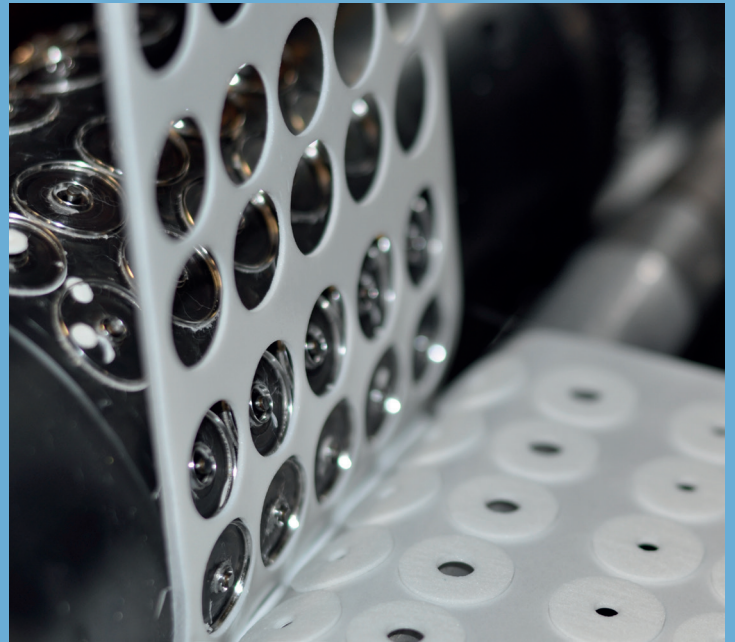

safe and
reliable
applications

sealing and
insulating
solutions

customisation for
efficiency and
aesthetic results
